Hi All!

I creating newer skin for XOOPS. Newer skin name is **Techno Blue**.

Skin is ready, I testing on Linux with Mozilla and Konqueror; on Windows with IE and Opera; and Mac with IE. I not found problem.

Skin working on my Xoops site: <http://kesigomu.kyed.com>

I now making package and then allow downloading Techno Blue skin every XOOPS user.

Sorry, but my english is pure 😞
