## xoops module umfrage (updated xoopspoll) bugfix - Modules

Posted by: joat

Posted on: : 2009/4/13 16:40:00

This module "umfrage - v1.0.4" (updated xoopspoll) doesn't work on hosts with register\_long\_arrays = 0

Since many hosting turned off  
register\_long\_arrays = 0  
in php.ini to reduce overhead with duplicated superglobals like \$HTTP\_\*\_VARS  
which are anyway deprecated by PHP, I change all those superglobals to  
appropriate equivalents of \$\_SERVER, \$\_GET, \$\_POST, etc.  
Also, I include to package Russian language. (UTF-8 no BOM)

Repacked with bugfix version renamed to 1.0.5 and uploaded to the same place where umfrage lives.

You can download that version at:

[http://sourceforge.net/tracker/?func=...\\_up\\_id=208418&atid=1005616](http://sourceforge.net/tracker/?func=..._up_id=208418&atid=1005616)
