hello,

I'm happy to announce a new website I've built for a client by using Xoops 2.3.3

<http://www.lebanonrentcars.com>

It's about cars rental in Lebanon. I used:

- xcgai 2.04 with some light modifications (thanks for Mowaffaq = arabxoops for his precious contribution)
- Contact 1.06

the theme is from xoopsgdesign collection, but i made many changes for it.  
Hope you will like it!
