

Biznis i Finansije running on Xoops - YAXS

NEWS_PDF_AUTHOR: bjuti

NEWS_PDF_DATE: 2009/5/20 4:20:00

[Biznis & Finansije](#) is a online edition of serbian print magazine of the same name.

It's running on Xoops 2.3.3 but the most of it is developed under XOOPS 2.3.1. I want to thank Catzwolf for a great help of updating the site on 2.3.3, because it doesn't worked as planned.

Used modules:

News 1.63 with few template and comment hacks

SmartSection 2.14 (I had no time to wait for Publisher or Article 2 to be in final stage)

SmartObject Framework

MyTabs 2.1

Protector 3.2

UserProfile 1.51

Tag Module 2.3b (with a little hack/fix for SmartSection, but now I have some problems in News module :))

RSS Fit 1.22

LatestNewsBlock 0.72

Liaise 1.27

MasTopPublish 1.1

SiteMap 1.3

WF-Downloads 3.2 (with a lot of templates hack)

MySearch 1.1

XM-Spotlight 1.02 (hacked by myself to work on 2.3 branch and I'm looking for a replacement, but in vain)

XoopsCare 1.3

XoopsPool 1.2

AltSys 0.61

Boox 1.6

XOOPS DB backup & restore 3.0

Oledrion 2.1

Dummy 0.1

Planet 0.2

MyComments 1.0

The theme is modified Community_Live, with a JQuery javascript framework used for some effects on the site.

Also, there is URL rewrite smarty plugin.

At the end I use php_speedy to speed up the whole site.

I'm sure that I've missed something, but who can remember a tons of hacks. I'm not very happy that Xoops missing some great stuff 'from the box' but I like it, and using it more than 5 years. :)
