WeÂ´re proud to announce a Xoops Site, made in 48 hours (thx Xoops!).

Using many classic modules, Jwele in Andalusia have one the best CMS youÂ´ll find over internet (Xoops, of course), giving a total control to our customer.

Jwele is a well-knowed brand in motherboards. TheyÂ´ve awesome models, like MINIX 780G, a very very little & powerful motherboard, or JWTN61S, the same i use an very happy with it, 100% recommended 😬

We will include a shop module (from Instant-Zero, of course), but we must to wait because the owner wants to move website to a new server. (actually, heÂ´s hosting himself).

Our best wishes for them. WeÂ´re proud to use Xoops for our projects. Thanks Xoops!!!
