WebdesignCreators theme WDC_010 - Themes

NEWS_PDF_AUTHOR: AxelF

NEWS_PDF_DATE: 2009/6/1 14:20:00

With the WDC 010 we present you a classic theme. The layout is simple and fast louding.

The theme comes with a cool grunde effect for the sitename in the header section. The effect comes from a css layer, you donÂ´t have to change an code, you only have to change the sitename in the backend.

WDC 010 is available in different colours, so you can pick out your favourite colour.

You can see the theme live in action. You will find it at our Xoops demo page:

LIVE Demo blackberry version
LIVE Demo blue version
LIVE Demo green version
LIVE Demo grey version
LIVE Demo yellow version

The download is, of course, now ready for you.

You can find the download of the blackberry version here
You can find the download of the blue version here
You can find the download of the green version here
You can find the download of the grey version here
You can find the download of the yellow version here
