

Win64 another take on Vista_K - Themes

NEWS_PDF_AUTHOR: aph3x

NEWS_PDF_DATE: 2009/6/3 23:50:00

Win64 is a 3 columns fixed width theme for XOOPS which is actually another take on the Vista_K theme i did a while back.

Completely recoded, theme was done with modern browsers in mind meaning that it won't display correctly on IE6 or older, has been tested on IE7 and 8, Firefox(windows and mac), Safari (mac).

The small windows logo under the header actually functions a bit like the start button in Windows where here opens a login box for non-users and a user menu for registered users.

Thanks to [trabis](#) who pointed in the right direction with a bit of coding which made theme is also available for XOOPS users 😊

Theme can be downloaded [here](#)

Theme can be viewed live [here](#)

HTML version along with the PSD is also available [here](#)

PS. ironically although its a Windows inspired theme..it was built on a Mac (go figure)
