Hey community,

I´m trying out some new stuff for my themes. I made one with a font resize for your users, the xoops user Ritchie from here was asking me abaout this option.

But before I will make this theme stable, I need some beta tester.

So if you´re interested into tersting this new feature for Xoops themes, ckeck it out

Please take some time of your day and test it for the community. If you will find errors, tell me plaese what browser you´re using!

Thanks a million
