

Genobio 0.13 (Alpha) - Modules

NEWS_PDF_AUTHOR: wishcraft

NEWS_PDF_DATE: 2009/6/26 14:10:00

Genobio is a Genological Profiler with Wiki Type Properties. It offers the ability to propagate information on a genological profile like a family or company base. It can also be cloned to a Personnel Profiler.

This is the Alpha 1 Release (which I know some of you have been playing with a pre-release copy). Please test and offer comments if you would like an example of this module please see:: <http://simon.roberts.co.in/modules/genobio/>

Download now: [xoops2.3_genobio_0.13.zip](#) (218Kb)

Notes

This was developed finally after I saw a request for some alternative to gedview for xoops. This is more basic but as you can it is more a xoopsie application.. This is the early alpha 1 I hope you like it..
