

xTransam 1.09 (Stable Release) - Modules

NEWS_PDF_AUTHOR: wishcraft

NEWS_PDF_DATE: 2009/7/8 6:00:00

Automated Language Translator for XOOPS 2.3.3, all languages on the google API Supported. X-Transam 1.09 is a translator for XOOPS 2.3.x it allows for core language files as well as module language file. It will import them off the hosting and write them in the correct XOOPS Location. Supports utf-8, utf-16, utf-32 & Unicode All formats.

Compatible with all Unicode, utf-8, utf-16, utf-32.

From Chronolabs

Features:

- * File by File Editor
- * Import a define keyword set
- * write to system
- * admin only
- * encoded storage (Any Database)

System Requirements:

- * XOOPS 2.3.x

Download: [xoops2.3_xtransam_1.09.zip](#)

Mirror: [Live Skydriver](#)

What to expect in the next release

For some reason the original hex conversion even when tested before releasing was flawed this has been replaced by a choice of conversion methods in case you are running funny bit methods or a none standard 8 bit computer.

In later version now there is a stable framework we will be offering importing of earlier language files and a few other options.

Shouts

Mamba - Testing & Feature Request

Rune - Just for being a pretty Norwegian artist 😊
