

IrCQ-Net Chat - Modules

NEWS\_PDF\_AUTHOR: DarinAllan

NEWS\_PDF\_DATE: 2009/8/4 13:10:00

This module uses trabis's Dummy module and IrCQ-Net code. It's a simple module that has no admin, it does have features of the Dummy module of course. I made this because my Gabbly Chat stopped working (gabbly.com problems), maybe others have a use for it. You can make some minor adjustments to chat room size and you can change the default chat room in the chat code.

Cheers ;o)

Please read included files for help

`configure_chat_code.txt`

`readme_dummy_module.txt`

[Demo](#)

[Download](#)
