We have had a softwareproduct for some time now and the website for this product dates back from 2003. It needed an overhaul.

We've used Alexander Galochkin theme "ixt01110" and made some modifications (like niftyborders, columns, etc.).

Since the site is running on XOOPS 2.4.0 beta (yeah, yeah.. I know.. ;) not all modules we wanted worked, so we have used the following modules:

- Content
- Cumulus
- XLOOPSTAGS
- News
- wfdownloads
- xforum
- xsitemap (thnx! nice module!)

Please visit the [EasyTCPtransfer website](#).
