

Release of indexscan RC 01 - Modules

NEWS_PDF_AUTHOR: culex

NEWS_PDF_DATE: 2009/8/30 16:10:00

This is a small module to scan your server folders for missing index.html files. If missing you can create.

The module obviously does not have a place in the frontpage main menu, but can only be accessed through administration as admin.

The module is testet with FF, Opera, and IE8 and checks out fine with all.

Should you discover any errors or is it not operating as intended please send email to culex@culex.dk.
