

## Indexscan 1.1 - Modules

NEWS\_PDF\_AUTHOR: culex

NEWS\_PDF\_DATE: 2009/9/16 18:00:00

I have decided to release indexscan as version 1.1, due to its new feature.

Ghia presented the idea to scan found index files for iframe injections and this feature has now been added to the indexscan module.

Note that not **all** iframes found in your webfolders are necessary bad, so check the code before you delete.
