Xurl QRCode enhancement for the XOOPS editor.

The Xurl module already adds QRCode creation to your website. Yesterday a Wordpress Plugin has been released for allowing users to create QRcode within the texteditor for posting news/forumposts etc.

Today, Designburo.nl is happy to announce the same functionality for the XOOPS community.

For more info and download go here : <http://2lk.nl/k4>
This is also the place for questions and feedback. Enjoy!
