

Ajax block for the News module - Hacks

NEWS_PDF_AUTHOR: Shiva

NEWS_PDF_DATE: 2009/9/26 11:00:00

Hi All,

I recently integrated jquery with the news module to create a new block. The new block makes a Ajax calls using jquery to refresh the news by filtering on the topics available. The block is based on the existing "recent news" block, so I have been able to utilize the code for that block to make development quicker.

This is my first stab at jquery integration so I am sure that there will be future releases with more polished code. Feedback will be appreciated.

Also pecial thanks to [Kaotik](#) for his support in developing this.
