The community [Nullos Xoops Planète](#) is proud to introduce its first (and certainly not its last) creation.

[FAMILLYCARPE Site No Kill](#)

FamilyCarpe Description:

*The association Famillycarpe aims to organize fishing events of various types and competition.*

*Also, to develop the fisheries in our cities through training and meetings between a fisherman and a novice, and to make fishing easier and more accessible to all.*

*Famillycarpe is focused on sharing the gift of and respect for nature.*

The theme is based in kris111 (great work Kris) reworked by Burning by creating the header of the site.

The logo was beautifully retouched by our Xoopser and specialist for special effects: Marcetmaud.

The general appearance of the site (color and css) was adjusted on the advice (wise) our Xoopser Ghia.

I do not have the list of modules and the names of their authors, but the last module (myCredits) will include a complete list.

**THANKS:**
