We apply 960 Grid System to make sure that it works well in most browsers. Meanwhile we improve the efficiency of coding, to lessen the loading time.
In addition to the new design, we shift from Mootools to JQuery. A lot of new features are created with JQuery.

The new deisgn of "Login Box" with "overlay" effect.

The new "User Menu" with "tip" effect.

The "New Post Panel" is completely redesigned. The tabs triggered by mouseover can be switched on and off with Toggle Effect.

(Click the thumbnail to enlarge)

For example, the "New Post panel is on by default". You can click "??????" (That means "Toggle the Panel") to switch off "New Post Panel" and the page become simple and clean.
