As they say, you should eat yourself what you cook, therefore we are pleased to let you know that we've updated the XOOPS Website to **XOOPS 2.4.2**, which is now in the SVN, and will be released in the next few days!!!

This will allow you now to delete multiple Private Messages at once.

And since we were updating the system, we also installed reCaptcha for registration.

FYI - the update was relatively painless, all the modules work fine, and we didn't lose any blocks. We've upgraded from XOOPS 2.3.3

If you discover any problems or anomalies, please let us know.
