xoBile (XOOPS Mobile) [v1.1 RTU] - Modules

This module allows you to show your XOOPS website on a mobile phone. (If there are plugins available for the modules you use)

Name: xoBile
Version: 1.1 [RTU] (RTU = Ready To Use)
Release: 27-11-2009

New in this version:
1. Added the articles plugin made by LadyHacker.
2. Added XOOPS Code replacing.
3. Added the posibility to style xoBile (For xhtml compatible phones).

Requirements:
- XOOPS 2.4*
- PHP 5 *

Installation:
- You can simply install this module as a standard XOOPS module.

Upgrade from xoBile v0.9x:
1. Uninstall the old fresh from the module through XOOPS Administration;
2. Remove the old version of the module of the server (eg via FTP);
3. Upload the latest version of the module;
4. Install the new version of the module through XOOPS administration.

Upgrade from xoBile v1.0:
1. Overwrite all the old files with the new one;
2. Update the module in the XOOPS module administration.

Questions:
- If you have questions, comments or requests you can place them on the forums on my website. (You can post in English, although the forum is Dutch)
