

xoBile (XOOPS Mobile) [v1.2 RTT] - Modules

NEWS_PDF_AUTHOR: Dyliau

NEWS_PDF_DATE: 2009/12/13 21:40:00

Name: xoBile

Version: 1.2 [RTT] (RTT = Ready To Test)

Release: 13-12-2009

New in this version:

1. Added WURFL based detection/redirection
2. Added Simple / Advanced style switch (Not in use yet)
3. Added class function to check permissions
4. Added permission check in system plugin
5. Added permission check in index.php
6. Added a temporary user page (Will be replaced by profile plugin)

Requirements:

- XOOPS 2.4*
- PHP 5 *

Installation:

- You can simply install this module as a standard XOOPS module.

Upgrade from xoBile v0.9x:

1. Uninstall the old fresh from the module through XOOPS Administration;
2. Remove the old version of the module of the server (eg via FTP);
3. Upload the latest version of the module;
4. Install the new version of the module through XOOPS administration.

Upgrade from xoBile v1.0:

1. Overwrite all the old files with the new one;
2. Update the module in the XOOPS module administration.

Support:

- Requests: http://www.dyliau.eu/forum/index.php?topic_id=9
- Bug reports: http://www.dyliau.eu/forum/index.php?topic_id=7

DEMO: <http://www.dyliau.eu/modules/xobile> (Dutch)

DOWNLOAD: <http://www.dyliau.eu/downloads/xoops.modules/xobile-RTT>

* NOTE: This module is "Ready To Test" so there is a higher chance that it contains bugs.
