## XOOPS 2.5 Pre-Alpha - XOOPS

Posted by: Mamba

Posted on: : 2010/1/6 4:20:00

Nicolas (ForMuss) just uploaded the new AJAX-ed System module to the SVN Trunk, thus starting the official **XOOPS 2.5** journey.

We hope to release the Alpha within the next week or so, but if you can't wait that long to put your hands on the code, then download the Pre-Alpha code from [SourceForge SVN](#)

Please note: "Pre-Alpha" and "Alpha" releases are moving targets, i.e. there will be a lot of changes, a lot of bugs, and there are no guarantees that anything will stay the same for the final release.

When testing, install it as a NEW installation.

Do NOT EVER update any of your existing production sites to this code!!!

The new System module uses extensively jQuery - please check out Blocks, Templates, and Image Manager, plus tons of other cool features to see and appreciate the changes.

ForMuss, Kraven, and Mage did an awesome work, and that's why they are our [Innovators of the Month](#) in January!!!

If anybody had ever any questions about XOOPS future - this is your answer!!! And this is only the beginning 🎉

As you've seen in the [XOOPS 2008-2009 Annual Report](#), there have been a lot of exciting activities in the last two years, the community is uniting, growing, and becoming more vibrant and active - creating new themes, new modules, and new Core releases - with the new XOOPS 2.5 coming out soon, and later on - the XOOPS 3.0.

With developments like this, 2010 will be a lot FUN!!! 🎉

**Please join us in this journey! Please help us make XOOPS the best CMS it can be. And then some more 🎉**

Just ask yourself: "What can I do to help XOOPS?" And then just go ahead and DO IT!!! 😊

Please follow-up in [this thread](#)
