

ZetaDigme Admin Gui 1.1 is released - Themes

NEWS_PDF_AUTHOR: kris_fr

NEWS_PDF_DATE: 2010/1/11 19:00:00

After [Mor.Pho.GEN.e.sis 3.1.2](#), [Xdt Standard 1.0](#) and [Css100_MorPho](#), the Laboratory [XooFoo.org](#) releases a Admin Gui Theme for Xoops.

ZetaDigme is based on Zetagenesis for the design, and Mor.Pho.GEN.e.sis for the skeleton. It is easily editable by novice and has a file xo_parameters.html to enable or disable features included.

Installation

Unpack the archive and upload all the folders and files directly into the folder 'modules/system/class/gui/' of your site

Information

Note 1: To use the opportunity to show or add blocks in the admin theme, you must save the file "function.block.php" in yourSite/class/smarty/xoops_plugins/

Note 2: You can disable or enable different files (include) by changing values in the file xo_parameters.html

Acknowledgments

- XOOPS Design Team for its participation in the development and use of this theme

template

- The [Afux](#) (Xoops Users French Association) for support in this project.

Credits

- [Voltan](#) for Oxygen Admin Gui
- [BitC3R0](#) for Exm Admin Gui

Download

ZetaDigme Admin Gui 1.0 is available [HERE](#)

Demo

Install the theme on your site, and you will! a screenshot is also viewable at this [link](#)

Extras

Join the Group [Mor.Pho.GEN.e.sis for Xoops](#) on Facebook! and/or [become a Fan!](#) and and get my daily news and tips and those of users on different templates theme for Xoops.
