

XOOPS 2.5 Alpha Released - XOOPS

NEWS_PDF_AUTHOR: Mamba

NEWS_PDF_DATE: 2010/2/1 6:30:00

The XOOPS Development Team is pleased to announce that a new version of the [#1 CMS solution hosted on SourceForge](#) - **XOOPS 2.5.0 Alpha** is available for download.

This release is a **major redesign of the System Module which has been AJAX-ed with jQuery** by our [December 2009 Innovators](#): Nicolas Andricq (ForMusS), Cointin Maxime (kraven_30), and Grégory Mage (Mage). Some of the new features are truly amazing, like the visual placement of blocks, and we're sure that the users will love them 😊

General changes in System Module:

- Added: smarty plugin for icon pack
- Added: smarty plugin for breadcrumb navigation
- Added: jQuery plugins for display popup or manage drag & drop
- Added: File Manager
- Added: Maintenance with Cache Clean-up, and Tables Maintenance
- Added: Visual module ordering with drag & drop
- Added: Visual block placement with drag & drop
- Added: Refactor all PHP code for use XOOPS API
- Added: Use template in the same way that front user, admin side for module can call a main template define in xoops_version.php
- Added: Allow override of template in admin theme like frontend if we set template in ADMIN_THEME
- Added: New variable 'system_menu' in xoops_version.php of each module, this variable generate a tab menu for module admin side if set to 1, this feature is for give one unique tab menu for all menu (eg: module PM for).
- Added: add jquery plugin in xoops_lib
- Added: change install for install admin template and admin setting
- Added: manage editor for blocks, comments and for all module if module developer want to use it activate or deactivate system section
- Added: choose number of line for admin section
- Added: display or hide tips

Avatar:

- activate/deactivate avatar with ajax

Banners:

- jquery popup for display banners

Block admin:

- drag n drop block for manage position and weight
- jquery popup for preview

Comments:

Installing XOOPS

1. Copy the content of the htdocs/ folder where it can be accessed by your server
2. Ensure mainfile.php and uploads/ are writable by the web server
3. For security considerations, you are STRONGLY encouraged to move directories "/xoops_lib" (for XOOPS libraries) and "/xoops_data" (for XOOPS data) out of Document Root, and change the folder names.
4. Make the directory xoops_data/ writable; Create (if not already present) and make the directories xoops_data/caches/, xoops_data/caches/xoops_cache/, xoops_data/caches/smarty_cache/ and xoops_data/caches/smarty_compile/ writable (permission 0777 on Linux).
5. Access the folder where you've installed the htdocs/ files using your web browser to launch the installation wizard
6. Follow the instructions

You can also check out the [detailed Installation Guide](#)

Debug information display level

Since XOOPS 2.3.1 debug information display level is enabled as a temporary solution for 2.3* to show debug information to different level of users: to all users, to members or to admins only. The configuration can be set in /xoops_data/configs/xoopsconfig.php
A new debug information tools will be available for 2.4 using FireBug (see <http://tinyurl.com/nmnpjdp>)

Files integrity check

The full XOOPS package is released with a script able to check if all the system files have been correctly uploaded to the server. To use it, follow these instructions:

1. Upload the checksum.php and checksum.md5 files located in the XOOPS package root to your XOOPS server folder (putting them next to mainfile.php).
2. Execute checksum.php with your browser
3. If necessary, re-upload the missing or corrupted system files
4. Remove checksum.php and checksum.md5 from your server

Modules

This release contains only the "system-related modules". You are invited to browse the XOOPS modules repository to if you need additional functionality. Note: as a new repository is being built, the current repository is not up-to-date, PLEASE VISIT INDIVIDUAL DEVELOPERS' WEBSITES TO MAKE SURE YOU ARE USING LATEST VERSION OF MODULES.
