I found a little program for tracking how often googlebot comes to your site and where it goes. I really haven't given it a through test yet, but it seems to be working pretty good so far.

The site is in french however, but the program has two language packs... english and french.

The site in french is here

<http://www.webrankinfo.com/googlestats/>

And using google to translate the site into english

[english translation](#)
