Galeria 1.2.7 is a correction of Galeria 1.2.6 to work with xoops 2.3. to xoops 2.4.4.

It can be see working in the new website i am working

<http://www.getxo2.es/modules/uskolaxgallery/>

Galeria is a gallery for high traffic sites and high volume of photos. With automatic publishing via ftp.

I am thinking about remaking the whole module to make it work with new xoops features, as Galeria was created 8 years ago as my first project in XOOPS, when XOOPS was a baby, and only few changes have been made over the years in order to keep it compatible with XOOPS versions.
