04. XOOPSers of the Month

Our **"XOOPSer of the Month" Award** is given to XOOPS members who show extraordinary dedication to XOOPS, and go the extra mile for XOOPS. Sometimes they do something spectacular, but most of the time they just do something everyday, but by doing it day-in and day-out, they make a **BIG DIFFERENCE** in life of XOOPS community. And we thank them for that!!!

This month, we would like to recognize **Hossein Azizabadi** ([Voltan](#)) from Iran for his continues support and development of Oxygen Admin GUI, that will be our default Admin GUI in XOOPS 2.5.   This is a second "XOOPSer of the Month" award for Hossien!!

Where are you from, and where do you live now?

I am from Iran . I was born in Tehran and now I live in both Tehran and Kasahn because my university is in Kashan (I am 23 years old)

How long have you been programming?

For about 3 years. But I would not call it programming - I can write CSS code and very little PHP.

What is your expertise?

I love creating XOOPS websites and new themes . And translating modules to my language - Persian.

What got you to XOOPS?

I think 3 years ago, I wanted to create a website for myself about cinema! Some people told me to use CMS! It's easy ! I found one fantasy website with XOOPSs (http://www.jadoogaran.org), and from there I found http://www.xoops.ir and http://www.xoops.org 😈

What do you like the most about XOOPS?

It's free and free (as in "freedom" and in "no cost"). It's easy to use, has a great code framework and offers a great worldwide community for developers! For users it has a good support and it's very useful for all kind of websites. And it's Open Source!

In what area of XOOPS do you contribute and why?

Localization and themes! My language and calendar is different from European languages and we need to write some code to change XOOPS to right to left! And I like to create new themes because I can use my creativity to implement any new idea into XOOPS themes, and XOOPS makes it so easy for us.

What is your major achievement in programming that you're most proud of?

In XOOPS 2.3 we've done a big localization for our language, but it was not only my work. Many people helped us in the translation and in debugging of language files. They told us what was needed and we've made it happen! I am very proud of the collaboration among Persian users

What are your hobbies, when you're not coding?

Reading books and watching my DVDs. Every week I go to library and get new books for reading. I am also working on improving my English. And then I have to learn my university lessons (textile).

You favorite dish and drink?

I love Iranian foods ! For example "gorme sabzi" and "abgosht" and "kabab" 😁

What about movies and music?

I love any movies ! Drama or action or fantasy and many more... (I have about 2000 movies)

If you would have a chance for a 30 seconds commercial with a message to the world, what would you say?

Stop all wars

Who is the person that you would like to meet and why?

I would like meet some XOOPS developers like phppp and Gijoe and Instant-Zero developers and ask them how do they create XOOPS core and modules 😁

05. XOOPS Innovation Award

Our **XOOPS Innovation Award** is given to people who create something very unique and very innovative for XOOPS! We are clear that XOOPS can only succeed, when we push the limits of our creativity, imagination, and innovation to "infinity and beyond" 😁. And therefore we would like to recognize people who create this "WOW!" effect, when we see what they've done. The **XOOPS Innovation Award** is not a monthly award, i.e. theoretically, there might be a month where we won't give one, but we certainly hope that this will never happen 😐

This month the first Innovation Award goes to **Davide N. P. Rossi** (dnprossi), from Italy, for his innovative work on the xNews

Where are you from, and where do you live now?

Born in Milan but always lived in Rome, Italy

How long have you been programming?

Since 1981

What is your expertise?

Database systems, Pascal programming and since I started with XOOPS - PHP, HTMS, CSS

What got you to XOOPS?

I needed a CMS for a friend and bumped into XOOPS finding it the most promising in features and easy to use for non experts.

What do you like the most about XOOPS?

Many sites I have installed are maintained by non experts in computing and they all use it without extreme trouble compared to others. XOOPS' ease of use and its modularity are excellent.

Why did you decide to work on xNews?

Same as above. In my point of view modules must be easy to use and the news module is an example. It needed some new features to keep up with other article management modules so I decided to work on it.

You just released the version 1.68. What are the future plans for xNews?

I am working on improving SEO functionality and have had success with both .htaccess and path-info in an x-language environment soon in 1.69. I am also working on tcpdf configurator so users do not need to modify code (hated makepdf.php). On request I will add topic weight ordering. I will have to do some cleanup work with old unused code. And anything that will come to my mind because I use xNews for practically everything news, blog, links, info and what ever.

If you could add one feature to XOOPS, what would it be?

I would like to see more multi-language functionality. (x-language included???)

What is your major achievement in programming that you're most proud of?

Between 1992 and 1997 the creation of a series of software products called Pc-Photo. This was for photographers who wanted to get their negatives and slides scanned, delivered on floppies, archived and viewed in albums.

What are your hobbies, when you're not coding?

Coding...

You favorite dish and drink?

I live in Italy, hard to say. Everything!

What about movies and music?

Rock, Blues and any movie that does not go beyond idiocy.

If you would have a chance for a 30 seconds commercial with a message to the world, what would you say?

Hello World!

If you could choose a place and time to live, what would it be and why?

Turkey. Spent a long joyful time there and miss it.
