XOOPS continues to show a strong presence in the Open Source CMS market, as shown by the number of downloads of its latest stable releases.

In the first ten weeks after releasing of 2.4.4, it has been already downloaded [more than 20,000 times](#).

Including the versions of 2.4.4 that are released locally (e.g. [French](#), [German](#), [Russian](#)), the number is even higher.

Our thanks go to all developers and contributors who make XOOPS the best it can be! And of course to our wonderful XOOPS Community for its continues support and contributions.

There will be soon a release of XOOPS 2.4.5 RC (see the [Beta release here](#)), and XOOPS 2.5.0 Beta (see the [Alpha 2 release](#))

XOOPS rocks! 😊
