
New (unofficial) Dutch translation team - XOOPS

Posted by: Dyliau

Posted on: : 2010/5/28 20:40:00

As many of the Dutch XOOPS users know there is still NO Dutch translation for the XOOPS 2.4 series and many of the new modules.

This has to change, and since I didn't get any response from the leaders of the "official" Dutch translation team on the status of the translation, I decided to start a new team.

This new team will be communicating through Google Wave and hopefully this will make the team more productive.

If you are interested please send a mail to [webmaster \[at\] xoops-info.nl](mailto:webmaster[at]xoops-info.nl)**
(Replace [at] with @ and remove the spaces between the words).

What do we expect of you:

- That you have atleast one hour of free time per week to translate.
- - Although we would be VERY happy if you have more time to translate.

- That you'll respect the rules we've set up.
- - You will find this rules in your Google Wave inbox when you join us. (Don't worry there are just a few basic rules 😊)

- That you have a Google (Wave) account, or ready to accept an account from us.
- - You can always get an account from us if you wan't, your mail/wave adress will then be: username@vertaalteam.xoops-info.nl .

And please remember, XOOPS is powered by YOU 🏆

** You can also apply to the team by responding to [\[THIS\]](#) forum post.
