Minimalism is a concept that has been overused so much. And I decide to “overuse” it myself.

This is a very simple theme, I finish the coding in three hours. However it takes much more time to finish the design concept in Fireworks (CS5).

The slideshow is integrated and has a very elegant control. And blocks are displayed in strictly grid-based columns.

Demo & Download

[Demo](#) and [Download](#)

The two parts which you need to customize is located in tpl folder. You can add slideshow by editing slideshow.html.

License

The theme is dual licensed under GPL 2.0 and MIT licenses.
