

New Premium Theme: InsProjekt & 960 Updated & More - Themes

NEWS\_PDF\_AUTHOR: insraq

NEWS\_PDF\_DATE: 2010/8/30 7:23:17

I am very happy to add a new premium theme to INSRAQ.me Shop: InsProjekt. As its name suggests, it is a theme designed for projects or products. But actually it may suit very different purposes.

The theme has a very clean and neat design. As I understand that many people prefer a simple theme rather than a theme with many many features. They like the theme to be just about “design” so that they can customize the functions as they like. It is hard to customize a very functional theme as conflicts will often be seen.

So InsProjekt is just about the design, there are only basic functions. The slideshow is not integrated with XOOPS block system. As such integration will cause some misunderstanding in blocks. But I promise the theme is easy to modify. I have put all the files that you will ever need to modify in tpl folder. Open the HTML files there and start customizing. You don't need to search the main files with lots of unrelated codes. And I've made detailed comments in the files.

To be consistent with our low price policy, the theme is only priced at \$2. Actually I am interested in Paypal system: If I the price is so low that it cannot cover transaction fee, how does Paypal charge that?

[Buy it now from INSRAQ.me Shop to instantly get your files](#)

[Demo is available](#)

And, I've updated 960 Grid System for XOOPS to ver 1.5. I've added tons of new features and fix lots of bugs. Please check out at Lab section.

Many people suggest that I set up a subscription club or something like that. They want to try all of the themes before deciding which one to use on production website. I also think it is a good

idea. But I am afraid that I might be busy some time and could not release themes regularly. If you paid for an annual membership, you expect to get themes on a regular basis. I don't want to let you down so I will not set up the subscription. However, I would apply the low price policy: charging the price as low as possible (to cover my hosting bills), so that even if you buy all the themes, it is still very affordable.
