EXAMPLES DEMO vs. HOW TO - Themes

NEWS_PDF_AUTHOR: algalochkin

NEWS_PDF_DATE: 2010/9/8 19:00:00

For the aid to the people using XOOPS Themes by IXThemes, some months earlier we have created section "How to" on site IXThemes Project.

After occurrence of this section the stream of questions on adjustment of our themes has a little decreased.

In spite of the fact that the basic options for creation of **YOUR VARIANT** of a theme from 2880+ possible variants are concluded in one file **assigns.html**, users continue to send questions. As questions basically repeat also answers to them are available in section "How to" now we do not plan to create section "FAQ".

Considering above-stated IXThemes Project offers users XOOPS the decision which consists in the new approach in granting of demonstrations of theme with examples (**EXAMPLES DEMO**).

Now you can look at new demo for ixt029xx themes on versions XOOPS 2.3.x, XOOPS 2.4.x, XOOPS 2.5.x (it is important, that options in a file assigns are switched without use JavaScript). Address to menu point "Features" and you will see many important features of Themes by IXThemes.

IXThemes Demo on XOOPS 2.3.3

IXThemes Demo on XOOPS 2.4.5

IXThemes Demo on XOOPS 2.5.0

Best regards, IXThemes Project

PS. We accept credit cards. 😃 We will continue to answer your questions (please attentively fill a field e-mail).
