Excuse for my english 😊

Here it is practically finished

- installation of the mask for the files class and js
- setting in files of the images
- xoopseration lol of the module
- correction various bugs
- mods multilanguage activated (french and english)

demonstration:::: [HERE](#)

Before putting it in down I seek possible testers to be able corrected the bugs if you are interéssé leave a comments or contacted me by mail at [kotshiro@hotmail.com](mailto:kotshiro@hotmail.com) and i search a traducteurs for the module and german,italian,shinese etcetc....
