
XOOPS Website Powered by XOOPS 2.5.0 RC - XOOPS

Posted by: Mamba

Posted on: : 2010/10/18 23:40:00

It's always important to "walk the talk", or [Fating your own dog food](#), so we have updated our Website to [XOOPS 2.5.0 RC](#).

This will allow us to find any problems before we release it to you, our users, as a Final release.

The update went very smooth, and as you can see, [XOOPS 2.5.0 RC](#) is working just fine, handling tons of traffic here 🏠

However, please **DO NOT** use [XOOPS 2.5.0 RC](#) on your production sites, it is, after all, still NOT the final release.

We have the experts in house, so we can fix things very quickly, which might not be the case with you. So please test it on your local PC and let us know any issues that you might have.

We would like to release the Final within a week or so, unless you report any major showstoppers. So let's focus this week and testing and more testing! 😊

And don't forget to vote for XOOPS in the Packt's Open Source CMS Awards!!! We need you vote!!!
