XOOPS 1.3.7 has been released. All users are strongly recommended to download the following packages and upgrade to this version.

To upgrade, it is as simple as just replacing (or overwriting) the old files with the new ones included.

Changelog
==============================
- Security related fix in private messaging system (pmlite.php, readpmsg.php, viewpmsg.php)
- Fixed javascript error in edit profile page (edituser.php)
- Fixed signature error in user profile page (userinfo.php)

New Users
Download Full 1.3.7 Package

1.3.6 Users
Download 1.3.6->1.3.7 Upgrade Package (zip)

Download 1.3.6->1.3.7 Upgrade Package (tar.gz)

Older version users, please see this article and upgrade your site to 1.3.6 first.
