XOOPS China ports Flyspray (bug tracking system) to XOOPS - Modules

NEWS_PDF_AUTHOR: Mamba

NEWS_PDF_DATE: 2010/11/16 11:20:00

Our friends at XOOPS China just ported **Flyspray**, a web-based bug tracking system, to XOOPS

Features include:
- Web-based, platform-independent
- Multiple database support, currently MySQL and PGSQL
- Easy installation
- Easy to use
- Multiple projects
- 'Watching' tasks, with notification of changes (email or Jabber)
- Comprehensive task history
- File attachments
- CSS themes
- Advanced search features (though easy to use)
- Atom/RSS feeds
- Two syntax options for task descriptions and more (Dokuwiki / plain text)
- Voting for tasks
- Dependency graphs

Download: here

Demo:http://www.linux-ren.org/modules/flyspray/

Original info: here
