This site is made last year, but now it's redesigned and upgraded to Xoops 2.5.0.  
This is my first production site with Xoops 2.5.0.

Theme is based on xd\_travel from Xoops gallery but heavily changed.

Modules used on this site:

- xnews 1.71
- good old multimenu 1.74
- mling hack for multilanguage (it still works!)
