## X-Invites 1.27

Welcome to X-Invites 1.27. This module is for mass email inviting it allows for your website client to enter their username and password for various of email services like yahoo, hotmail, rambler, mail.com, fastmail and many others and will download a list of the email clients on that service.

It will then allow for an email to be sent inviting the person on that email to sign up to your website.

This is a implementation of http://www.openinviter.com

If you would like to download this module:

Download: xoops2.5 xinviter 1.27.zip
