Profile 1.62

Verbose Validation Edition

*Sponsored by **Child Share** and **AFS Espania***

Profile 1.62 is a version of *Profile module for XOOPS* that allows for a verbose registration to be done.

This has a field for **validation** that allows for Text Match, RegEx or SQL Validation to be used to prevent people registering with your website without having validation data of some type such as an existing email address or an invite code or some regular expression statement.

Featuring still Multiple Fields, 2 Types of validation - one which uses JSON; the other that uses the Field \$ POST validation method.

Simply upgrade your existing XOOPS 2.4 or 2.5 to XOOPS Profile 1.62 to experience the difference. We can really recommend *XinCodes 1.02* for a user based invitation to be done.

Download: [xoops2.5_profile_1.62.zip](#) - **108 Kb**

Demo: Pre installed at <http://xoops.demo.chronolabs.coop> or try <http://www.xortify.com/register.php> and put in my email address for validation. Notice how it unlocks the form wherever it is.

--=[Example SQL Validation for a basis of pre-existing users email, remember to change 'prefix' to your database prefix]=--

```
Select count(*) from `prefix_users` where `email` LIKE "[value]" and `level` > 0
```
