

Neurogel en marche : Association for the cure of paraplegia and tetraplegia - YAXS

NEWS_PDF_AUTHOR: tatane

NEWS_PDF_DATE: 2011/1/23 16:04:24

I am very pleased to introduce the new association website [Neurogel en marche](#) which is now based on Xoops

NeuroGel in March is an association of public utility and the owner of the patent NeuroGel. The NeuroGel is a biomaterial that has properties very similar to those of the spinal cord. It is used as a growth medium for regeneration of nerve fibers in a lesion.

Several researchers have demonstrated that the NeuroGel applied to a lesion of the spinal cord can restore mobility and sensitivity to animals para or quadriplegic. The association in NeuroGel Walk is a unique movement in the world where paralyzed and researchers join forces to fund the first clinical trial on humans of a new therapeutic approach, embodied by the NeuroGel.

The site is based on version 2.5.0 Xoops

It uses modules:

- News 1.66
- MyTube
- Publisher
- Liaise
- Evennews
- TDMdownloads
- Xdonation

Modules News MyTube Evennews and were modified and adapted by Mr Yannick Le Guern :

[Development and web design](#)

Development graphics has it been developed by the [studio Ricome](#)
