Hi all

we are working on a new version of **Content module** (by Nicolas aka ForMuss) and I think it's ready for test . if you have time please help us to test and debug this module .

please download and test from [here](#)

some of the changes :

- 1- Complete menu system
- 2- Add tag module support
- 3- Add Comment support
- 4- Improve templates and design
- 5- Support XOOPS search
- 6- RSS
- 7- Add Bookmark whit show/hide option
- 8- Add facebook/twitter/Google buze shear logo
- 9- Add some options for show/hide information in user side
- 10- Advertisement
- 11- improved blocks
- 12- Attach image
- 13- Permission system
- 13- Default content for each topic

Planned for this version:

- 1- check friendly url mode
- 2- select submenu
- 3- multi columns

Planned for next version:

- 1- Submit page in user side
- 2- Show/hide summary table in each article static page
- 3- Add navigation box
- 4- Add Notification support
