GenoBio 1.16

Family, Parents, Siblings Profiler

Genobio is a Geno-logical Profiler with Wiki Type Properties. It offers the ability to propagate information on a genological profile like a family or company base. It can also be cloned to a Personnel Profiler.

With Sibling and Parental Nodes, including photos and profiles, GenoBio can also be used for corporate profiles as well, but ideally suited to displaying family trees and family data.

This is the last stable release so far. Please test and offer comments and bug tickets on the mantis bug tracker.

Bugs Fixed:

- Editors not working
- Editors sizes not working
