Dear Community,

After reading some forum entries where (I think especially) the german community was upset about this special licence for posting the language files, I decided to quick-translate the language files for you.

This is the german "DU" Version with (not that mixing Du/Sie feature!!) a correct grammar and spelling (my personal opinion). I also excluded the "un-substanives" we all knew from former translations: (all p.nuke-CMS were buggy in this way. E.g.: Haupt Einstellungen, Administrations Menu) Hopefully this will help you all! Greetings from Germany [MosesTycoon](#) P.S.: Uuups, the link: Watch out [here](#) and don't forget to watch your specific theme for further translationfiles... (I can't translated all themes)
