XOOPS 2.5.1a Quick Fix Release - XOOPS

NEWS_PDF_AUTHOR: phppp

NEWS_PDF_DATE: 2011/4/20 16:20:00

Upon community demands, the XOOPS 2.5.1a is released as a quick fix for 2.5.1 release.
There are two fixes included: module name and order updates, missing "block_type" for adding
custom blocks. A separate quick fix was released on April 12th, there is no new fix added to the
2.5.1a release.
As stated in the quick fix, there are bugs and security weakness introduced into XOOPS 2.5.0.
In XOOPS 2.5.1 all known security weaknesses have been fixed and the development team will
be continuously improving it.

Download XOOPS 2.5.1a from Sourceforge repository.

For installation and upgrade instructions, please read the XOOPS 2.5.1 release notes
