QRCode module for XOOPS - Modules

NEWS_PDF_AUTHOR: chco2

NEWS_PDF_DATE: 2011/4/28 19:20:31

Dear XOOPS community and developers.

We have just released a QRCode module for XOOPS developers.
It allows for easy creation of various QRCodes.
Currently the following QRCode are supported :

- Visit a website
- Call a phonenumber
- Send a SMS to a cellphone
- Plain text
- Send an email
- Lookup GPS coordinates
- Create a business card

Developers can eassly utilize this module for creating QRCodes. Detailed instructions are available in the admin section after installment. Install as any regular module by copying the contents of the zip folder to your modules folder.

Dear XOOPS community and developers.

We have just released a [QRCode module](https://xoops.org) for XOOPS developers.
It allows for easy creation of various QRCodes.
Currently the following QRCode are supported :

- Visit a website
- Call a phonenumber
- Send a SMS to a cellphone
- Plain text
- Send an email
- Lookup GPS coordinates
- Create a business card

Developers can easyly utilize this module for creating QRCodes. Detailed instructions are available in the admin section after installment. Install as any regular module by copying the contents of the zip folder to your modules folder.
