

XOOPS moving forward - XOOPS

This is to let you know that DJ has resigned from the XOOPS Council.

I am happy to announce that:

- **Trabis** (who was in charge of XOOPS 2.4.x series)
- **ForMuss** (who was in charge of XOOPS 2.5.x series)
- **BitC3R0** (author of the EXM fork and [RMCommon utilities](#))

have agreed to take the lead on creating **bug-free XOOPS 2.5.2**, and on working together on **XOOPS 2.6**. We'll be also reaching out to other top developers who have been active in the past in XOOPS but left XOOPS for various reasons.

There might be also a possibility that Onokazu will be joining us as well, although I didn't speak with him yet directly, so I cannot confirm it.

So the future for XOOPS users is assured - we have the currently top XOOPS developers (Trabis, ForMuss, BitC3R0) forming a strong team to lead us forward.

I firmly believe that the worst is behind us, and with Trabis, ForMuss, BitC3R0 we'll have finally a great team environment, where contributions from all members will be valued and appreciated.

Viva XOOPS! 😊
