[CMS Report](#), one of the leading Web publications focused on CMS issues, publishes since 2006 a list of "[Top Web Applications!](#)"

The list is being updated to make sure that it stays relevant, and the new update was just [published few days ago](#).

XOOPS was there from the very beginning, since June 2006, and we're very happy to see that XOOPS is still remains strong after all these years! 🎉

From the original 2006 list, there are only 6 still remaining:

Drupal  
Joomla  
TikiWiki  
Typo3  
Wordpress  
XOOPS

so as you can see, we're in a very good company 😊

Viva XOOPS!
