Maquee 1.03

Community Sponsor [Pham Design](#)

Maquee 1.03 - is a Marquee for XOOPS 2.4 and XOOPS 2.5 it uses JQuery for running a marquee in either blocks, default content or all of the above. You can have HTML or Image Marquees and with a wide variety of options can display a good marquee on your site. Allowing for both image and HTML or Xcode marquee you can display on your site a marquee which fades or slides according to the options you select.

This module also supports XLanguage and has multilingual support so you can have different components of a marquee on multiple language settings using the XOOPS API Language options.

There is a mirade of options with this application. You can specify URLs to link people to, weights, language type, image or text as well as speed, timeout and animation type all at the click of a button.
