Speed Test 1.01 - Beta

Community Sponsor [Fibre dyne](#)

Speed test is based on Brandon Checketts opens source speed test (see: <http://www.brandonchecketts.com/open-source-speedtest>)

Features:

- * Upload and download bandwidth tests
- * Interactive user experience
- * Very customizable
- * Saves results in a database
- * Restrict to particular networks / IP Addresses
- * Customizable look
- * Customizable maximum file sizes

Troubleshooting

Speed test results seem accurate up to about 10 Mbps. At speeds higher than that, the large chunks of data start to slow down the JavaScript engine on the client.
