

xTransam 1.16 - Manual/Automated Translation Tool - Modules

NEWS\_PDF\_AUTHOR: wishcraft

NEWS\_PDF\_DATE: 2011/10/28 16:40:06

### **xTransam 1.16**

Community Release by [Chronolabs Co-Op](#)

Automated Language Translator for XOOPS 2.5.x, 2.6.x, all languages on the google API Supported. X-Transam 1.14 RC is a translator for XOOPS - it allows for core language files as well as module language file. It will import them off the hosting and write them in the correct XOOPS Location. Supports utf-8, utf-16, utf-32 & Unicode All formats.

Compatible with all Unicode, utf-8, utf-16, utf-32.

Please watch this introductory demo of XTransam 1.15

*From Chronolabs & The XOOPS Project*

#### Features:

- Multiple Translation API Plugin System
- Manual Translation
- File by File Editor
- Import a define keyword set
- write to system
- admin only
- encoded storage (Any Database)
- Recursive folder reproduction
- 2 APIs for Automated Translation

#### System Requirements:

- XOOPS 2.5.0 +

Bug Fixes:

- Google API Provider - Array Position of Translated Text
- Google API Provider - Array Position of Error Code & Message

*Please note I do believe the Google API doesn't work on local host (127.0.0.1) this has always returned a message that it has reached its daily limit.*
